ROXELL HEATER RANGE

A high-performance house heating system is crucial for any livestock farmer given the high cost of energy. That’s why Roxell heating systems are designed to deliver outstanding performance. With our house heating systems, you can keep your energy bills under control. You also get a constant temperature, exactly where and when you want it.

With Roxell, you have a choice between systems. After all, poultry and pigs have different needs. Also your preferred type of fuel source determines what kind of house heating system you need. With the following decision tool we want to offer you a guideline for making the right decision within our range.

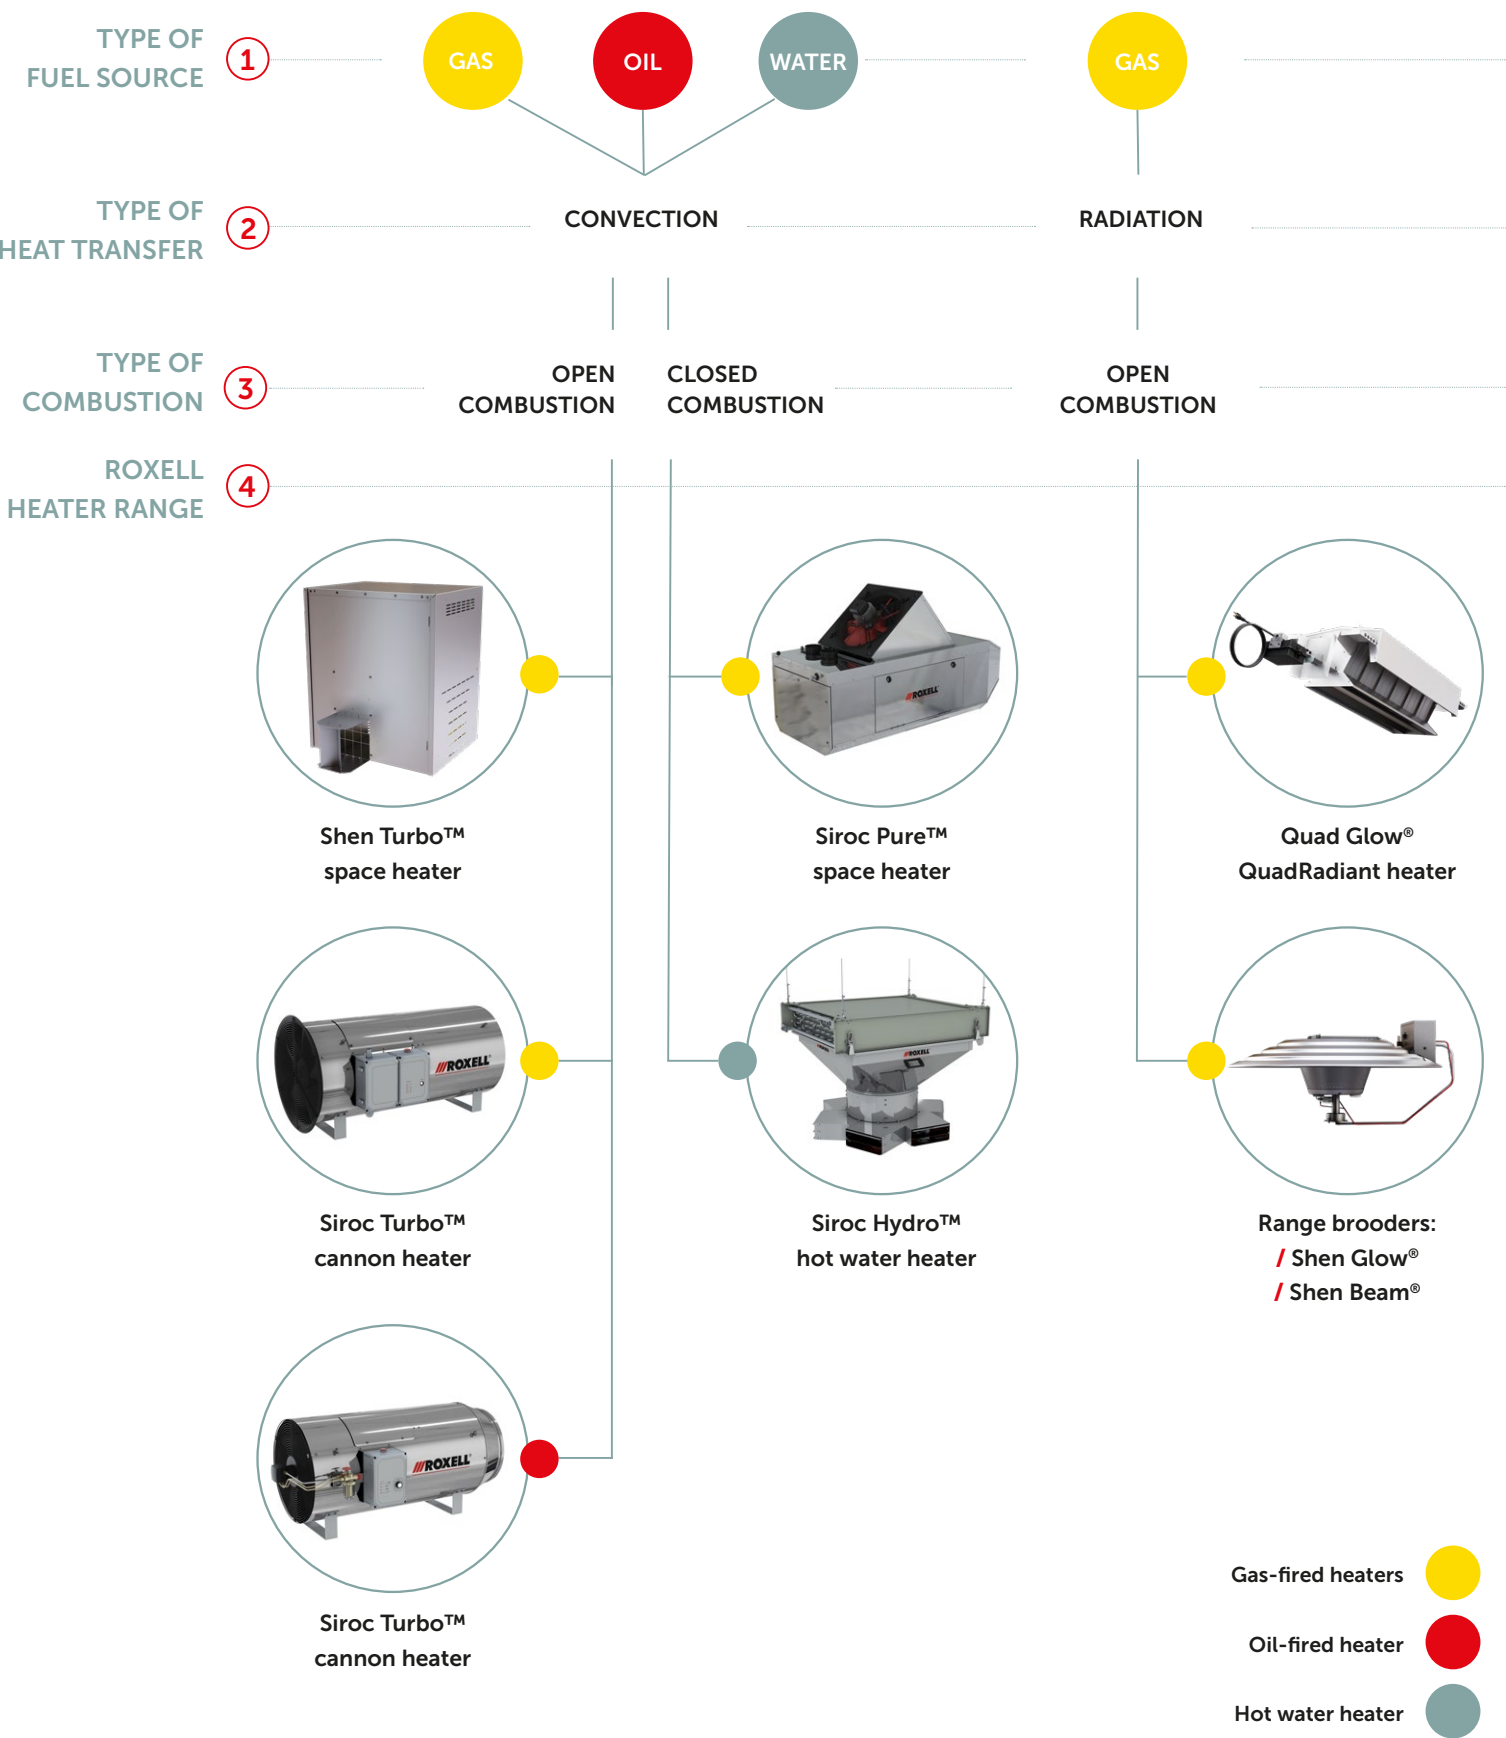

CONVECTION AND OPEN COMBUSTION		SHEN TURBO		SIROC TURBO			SIROC TURBO		
Model		100	250	70	100	120	8L	10L	12L
